

APPENDIX 1

Basic requirements to move across European country borders for professional purposes

Certificates for the completion of the theoretical work

After successful completion of the different parts of theoretical work, the trainee should get a certificate for the respective part. All in all, these certificates allow the trainee to document the complete conclusion of the theoretical work.

Records(logbook) of practical clinical work and clinical skills

Many trainees already keep a record or have a record kept automatically of patients for whom they have provided care. It is not proposed as a requirement of becoming a European specialist/consultant with specific knowledge and skills in Wound Healing. However, when doctors seek to gain employment in an EU country other than their own (or the one in which they have been trained) they might be required additional documentation, in that they provide access to appropriate records (logbook) demonstrating the extent and nature of their practical clinical experience and skills to a future potential employer and any other relevant body (for example a statutory medical body that grants employment rights within a country). An example for a logbook is listed in Appendix 1A

Additional information as a confirmation of progress of a trainee

Doctors seeking to gain employment in a country other than their own or the country in which they have been trained will be required to provide additional references that provide details about:

1. The curriculum that the trainee has followed
2. The nature of assessments completed by the trainee and the outcomes of any assessments undertaken by him/her
3. The outcomes of assessments of a trainee's professional behaviours
4. The good-standing of the trainee
5. The nature of the quality assurance processes by which it is known locally that the quality of the curriculum and its delivery are satisfactory

APPENDIX 1A

**The structure of the logbook for the practical clinical work of the European
Training Requirements in Wound Healing**

**UNIT 1: WOUNDS AND WOUND HEALING
hours**

4

Fill out the kind of practical work performed	Signature
e.g. definition of various healing phases	

**UNIT 2: NUTRITION AND WOUND HEALING
hours**

2

Fill out the kind of practical work performed	Signature
e.g. development of a specific diet plan for a given patient	

**UNIT 3A: MICROBIOLOGY AND WOUNDS
hours**

4

Fill out the kind of practical work performed	Signature
e.g. reading of swab and antibiogramme results	

UNIT 5: MOIST WOUND HEALING
hours

12

Fill out the kind of practical work performed e.g. assessment of a wound in a given patient	Signature

UNIT 6: NON-DRESSING BASED TREATMENTS OF WOUNDS
hours

5

UNIT 8: DIABETIC FOOT SYNDROME
hours

10

Fill out the kind of practical work performed	Signature
e.g. decision for the appropriate supportive care in a diabetic foot ulcer	

UNIT 9: LOWER LEG ULCERS
hours

15

Fill out the kind of practical work performed	Signature
e.g. performance of the diagnostic procedures to define a venous leg ulcer	

UNIT 10: DOCUMENTATION
hours

3

Fill out the kind of practical work performed	Signature
e.g. appropriate description of a given wound	

UNIT 11: VARIOUS
hours

4

Fill out the kind of practical work performed	Signature
---	-----------

ENTRUSTABLE PROFESSIONAL ACTIVITIES (EPA) REACHED DURING THE EDUCATION

An EPA is 'a critical part of professional work that can be identified as a unit to be entrusted to a trainee once sufficient competence has been reached'. This indicates whether one could trust the individual to perform the job and not whether he/she is just competent to do it. This level goes beyond simple competence and would constitute the highest critical level of competence in a formative and summative assessment.

EPA	EPA reached (date)	Signature
To provide patient-centered care		
Ability to work in interdisciplinary teams		
Employ evidence-based practice		
Apply quality improvement		
Utilise information and other technologies
